

floviva Argan Oil

Nourishing Skin. Naturally.

ProTec
Botanica

Overview

Argania Spinosa is a spiny-branched, evergreen tree with small, oval, leathery leaves and yellow-green flowers, followed by fruits that consist of a thick outer skin, soft pulp and a hard nut containing the oil-rich seeds.

We work closely with our Moroccan partner and their organised fruit and nut collection co-operatives located high in the Atlas mountain range.

Properties, benefits & uses

floviva Argan Oil is rich in natural vitamin E and polyunsaturated fatty acids. It contains a beneficial balance of omega-9 oleic acid (C18:1), omega-6 linoleic acid (C18:2) and palmitic acid (C16:0), and is a versatile oil used in many formulations and for a variety of personal care applications, primarily skin and hair care.

The fats and antioxidants in floviva Argan Oil can help the body stay healthier. The oleic and linoleic acids that make up the majority of Argan Oil's fat content are vital nutrients for maintaining healthy skin and hair. It has the ability to moisturise, regenerate and protect dry and damaged skin. When applied in hair care formulations, floviva Argan Oil can leave the hair feeling soft, shiny and glossy.
